

CORONAVIRUS DISEASE (COVID-19)

STATEMENT FROM THE LIFTING LOUNGE REGARDING COVID 19

The Lifting Lounge is a **unique** platform that supports **crane operators** and **crane specialists** from all over the world in their working day. As we face such challenging times together we have provided a basic guidance for helping you to remain safe during these difficult days. Along with any advice we have provided we would also ask that you primarily follow your government's guidance during this pandemic. We must all contribute in ensuring that we follow safe practices regarding our personal hygiene therefore not allowing the spreading of the virus.

You could also share your experience or take the opportunity in gaining further information by asking a question in the forum. This area can provide tips on what other lifting professionals are doing during these unprecedented times.

One of the core benefits of the Lifting Lounge is to give that platform which can allow communication. Taking time out to talk during these days is strongly advised in maintaining our own mental health.

We don't know what affect the pandemic will have on us as individuals, so we have taken advice from the World Health Organisation and other internationally recognised public health bodies in providing advice on psychosocial support and mental wellbeing.

Please take a look at the supporting materials we have provided in the tips section to support you during this time.

The Lifting Lounge is an online site, so why not add to its content with your images and conversation whilst remaining safe at home if you are self-isolating.

Please remember to look after yourselves and each other during this global crisis we face together.
